HP Compaq dc5100 Business Desktop PC

The HP Compaq dc5100 Business Desktop PC offers enhanced manageability solutions, long lifecycles, and common software image to help reduce support costs and simplify PC ownership for a wide range of business needs. Available in two chassis configurations this flexible desktop provides mainstream features and support for simple deployment into any existing IT infrastructure.

Easy to deploy

With a single software image that is common across products with common chipsets, the HP dc5100 is designed to provide a consistent, stable platform. This enables IT and procurement managers to plan system deployments over time periods of up to 12 months.

Easy to manage

The HP dc5100 features integrated manageability tools to help simplify management by minimising hardware and software changes throughout the life of the PC. Proactive HP programs such as HP Change Control and Product Change Notification (PCN) mean changes can be planned for up to 60 days in advance. PCN is available to all customers with registration available on http://h30046.www3.hp.com/subhub.php.

Enhanced productivity

With stable, long lifecycles and manageability features that allow customers to manage the transition of PCs in networked environments, the HP dc5100 maximises productivity by enabling those customers to focus on their business.

Exceptional lifecycle value

The HP dc5100 helps customers lower ownership costs by delivering pre-installed software images and a common chipset, helping to reduce the need to re-qualify models. The HP commitment to provide a stable and consistent platform with comprehensive manageability allows customers to maximise return on IT investment.

Flexibility to suit specific business needs

With a choice of two serviceable design forms the HP dc5100 offers built-in flexibility and allows customers to select exactly the right mix of features to suit their business environment and budget.

Service and support

The HP dc5100 is supported by a robust, service-and-support portfolio and a 3/1/1 warranty upgradeable to 3/3/3.

Mainstream features and advanced manageability for a wide range of business needs
